Fredonia

Giant Thornless BOYSENBERRY

Bears ten days to two weeks earlier than its parent (Thorny Boysenberry), thus insuring top market prices. The production is even greater than regular Boysenberry which has produced almost six tons per acre.

Vines are smooth, resembling a grape vine with shoots from 15 to 20 feet long. Easy to pick and handle—a labor saving to both the commercial and home grower.

Flavor is a wonderful combination of Raspberry, Loganberry and Blackberry. It's a sensational, satisfying taste that you will long remember in pies, jams, jellies, cordials, canned or fresh. Our Hardy, Northern Grown Plants have proven to withstand sub-zero weather splendidly and are your assurance of absolute success.

Westhauser's BLACK RASPBERRIES

MORRISON

The Elephant of the Blackcap Family

Berries are unusually large, even larger than Cumberland, measuring up to 1 inch in diameter and holding their size until the last are picked. These mammoth, glistening, jet-black berries are highly flavored and not very seedy. The strong, heavy plants are disease-resistant. We have a fine lot of these hardy, Northern Grown plants; supply still limited. Order now and avoid disappointment.

CUMBERLAND

Leading Commercial Variety

Best and most dependable of all blackcaps, does exceptionally well in all climates; produces biggest cash crops. Thrives on any kind of soil. It is the firmest of all, holds its size, does not crumble. Buyers pay top prices for these beautiful, attractive, large jet blackcaps. Seeds are comparatively small, and their luscious, sweet flavor makes them a favorite fresh or canned; delicious fresh frozen.

EARLY WONDER Thornless

This *Wonder* berry was discovered here in Michigan some years ago by Mr. Henning who found it growing in a patch of Lathams. Now he, and many other wide-awake farmers are growing *Thornless Early Wonder* exclusively. *Early Wonder* is a combination of tested and proven merits. The large, sturdy plants have a silky wood, no stickers. The berries are borne in large, beautiful, bright red clusters, and are very firm. They do not crumble and are excellent shippers. A tasty delicacy, fresh, canned, fresh frozen, in preserves, jams and jellies. Sold exclusively by Westhauser Nurseries.

Golden Queen

HOW TO PLANT STRAWBERRIES IN THE FALL AND SUCCEED

After planting, just before the hard frosts come, cover the plants with either old leaves, straw, grass or manure that contains a considerable amount of straw. Leave this on until the heavy frosts are over in the spring, then remove this mulching substance. The mulch protects the plants from frost and winter weather that often heaves plants out of the ground, which often times results in complete failure. We have made a practice of fall planting for quite some time now and have had unusual success. The big advantage of fall planting is that you get some of your work out of the way before spring; there never seems to be quite enough time to get everything done in spring.

GIANT HYBRID BLUEBERRIES

ONCE PLANTED LAST A LIFETIME—Profitable and Ornamental

The Cultivated Blueberry produces juicy, delicious berries two to three times as large as common Blueberries, resembling in size a bunch of Delaware grapes and selling for 40c to 60c a quart wholesale. They are beautiful ornamental bushes reaching 8 to 10 feet in height with pinkish white, bell-shaped blossoms, and long, narrow, dark green foliage that turns coppery red in fall. An improvement in every home planting.

Cross Pollenization: At least two plants should be planted for cross pollenization.

Every farm has an ideal location adapted for cultivated Blueberries; however, if not, home and commercial planting adaptations are easily created. The soil has to be moist, loose, and contain acid; after digging your hole, take the top soil and mix half and half with leaf mold, marsh soil, rotten straw or vegetable refuse, or Westhauser's Acid Gro-Kwick. We also recommend a handful of sulphate of ammonia around the plants in the spring. This can be purchased from your local feed or hardware store. Space plants 6 to 8 ft. apart.

In our Michigan fruit belt, farmers are making big profits and are extensively planting large acreages. Get in on the big money!

2-yr. Blueberries, heavy-rooted transplants, 8 to 12 inches. Prices: 2 for \$2.50; 4 for \$4.50; 12 for \$12.60.

FOR QUICK RESULTS

GIANT 5- and 6-YEAR TRANSPLANTS

Loaded with fruit buds, will fruit heavily first year. 6-year plants average 2 to 3 feet; 5-year plants, 2 feet and up. Considering Blueberries reach full fruiting stage at 9 years, these plants are well on their way, and often pay more than their cost the first year. These plants are packed in Westhauser's Acid Gro-Kwick, Nitro-Organic Humus, use it mixed with good rich top soil when planting.

6-yr. plants, \$5.00 each; 2 for \$9.50. 5-yr. plants, \$4.00 each; 2 for \$7.90.
